Pharmacy is consistently ranked as one of the most highly trusted professions because of the care and service it provides.

*\*According to data by Gallup International*

Pharmacy is an exciting blend of science, health care, direct patient contact, computer technology, and business.

### Pharmacy Laboratory

- Developing the competency in the art of prescription compounding
- Prescription filling and unit dose
- Sterile and intravenous preparations. Learning aseptic technique and universal precautions

### Computer Room and Media Center

- Access to Pharmacy Management Software (Visual SuperScript)

### Classroom

- An interactive classroom setting where students can “backchannel” engaging each other along with the instructor in processing the lecture content.
